REPORT OF SCHOOL BOARD

OF RICHMOND, N. H.,

FOR THE YEAR ENDING MARCH 1ST, 1894.

The School Board of Richmond presents to its citizens this, the eighth annual report, of the condition of the schools under the town district system.

There have been five schools the past year, with 24 weeks in each. In making this number of schools by uniting and transporting, the board felt that more schooling and better schools, by securing more experienced teachers, would be the result, with which it has been favorably met.

The schools the past year have generally been successful. There have been no decided failures, yet there were instances where the schools were not what they should have been, and will not be until there is a revolution of affairs in school work.

Parents, you love your children and wish to make the pathway of life bright before them, and bring them up to manhood and womanhood honored and respected citizens. This can only be done by virtuous training.

Let the home surroundings be of such a character as will stimulate them to ways of uprightness, and in the school let your interest be with them, and show to them that you are anxious for their progress and good conduct.

Teach them obedience at home and they will surely imitate it in school. A mistake is often made by parents when a child comes home from school uttering grievances, to take his or her

part and hurl revenge on the teacher, instead of ascertaining from the teacher the true cause.

In looking through the list of visitors we find only two schools where the names of any of the fathers are recorded in the visitors' lists. These are in numbers 2 and 5. The names of mothers appear quite often, but not so much as we would like to see. Let us urge upon both fathers and mothers to take a greater interest in the schools in the future than has been shown in the past. It is your duty, and by so doing you will render great assistance in raising our schools to a higher standard of excellence. We can see that where the parents take a decided interest in their children and in the schools, there is less contention and greater progress.

STATISTICAL.

Whole number of pupils enrolled, 92. This number includes three that have attended from Fitzwilliam. One pupil has been schooled in Troy, which is not here enumerated. Average number belonging, 76; average daily attendance, 72.5; number of visits by the school board, 43; number of visits by others, 335; number of dismissals, 83; number of tardinesses, 78; number of half days' absence, exclusive of non-membership, 1033,—occurring in the several schools as follows: No. 2, 221; No. 4, 48; No. 5, 218; No. 6, 264; No. 13, 292.

SCHOOL HOUSES.

Some repairs have been made in school houses, yet not all that was intended to have been done last spring, but should be done the present year. The most important is at No. 1 and No. 13. New seats have been put in at No. 4, the past year, also other miscellaneous repairs on other houses. We would recommend that a reasonable sum be raised to put the houses in comfortable condition.

IRREGULAR ATTENDANCE.

It is needless for us to continually speak in tones of reproof against the amount of irregular attendance that exists in some of the schools; it is not only depriving the scholar of that most useful of all things, but it is creating in them a dislike for school, and if prolonged, much evil will necessarily follow.

SCHOOL BOOKS.

There has been no change in the books the past year, except in getting a higher physiology for No. 6. Another year they should be obtained for some of the other schools. There should be a change in the arithmetics, also the reading books, either for some other series or change to supplementary reading.

SPECIAL REPORTS.

The summer term of No. 2 was taught by a lady who has taught in town for several terms with commendable success; but owing to her health failing, the last part of the term the school did not make the progress to be desired. The second term was taught by a graduate from the Kindergarten Normal School who has had some experience in our common schools, with marked success. She is enthusiastic in her work, and seems to have a faculty of imparting her enthusiasm to her pupils. The closing exercises won the commendation of all present.

The summer term of No. 4 was taught by the same teacher of the previous year with the same good success; but the committee thought best to transfer her to a larger school. The fall term was presided over by one of our own teachers, with marked success. This school is the smallest in town, and we cannot expect that interest on the part of the scholars as in a larger school, but for all that they had a fine examination.

The summer term of No. 5 was in charge of a teacher of experience, part of which has been in this town, who labored faithfully and with good success.

The fall term was under the management of a graduate of our State Normal school, who proved to be a person in the right place. Perfect harmony existed in the school, and the examination was most praiseworthy. This is the largest and most advanced school in town.

The summer term of No. 6 was a fair success, which we cannot say of the fall term. The causes may be better known by the parents than the board. If the parents fail to co-operate with the teacher, and try to encourage her, and the school is not a success, the fault is not wholly the teacher's.

The summer term of No. 13 was under the management of a teacher who made her beginning here last fall, with very good success.

The fall term was in charge of one who possessed considerable experience in school work. Our impressions at our first visit, the fore part of the term, were very favorable; at the close we found only seven pupils in attendance, and judging from what was then witnessed, the teacher had tried hard to make the term a success, and had not failed entirely.
